PREFACE.

IN offering the collection of coins herein catalogued Dr. Ely desires me to publicly announce that his interest in the science remains, and that he does not relinquish the pursuit of the numismatist, but confines his study and collecting to the more precious metal of gold, his cabinet of which has already attained a wide reputation.

Collectors will find herein a more complete collection of dates, types and mints of the United States than have been offered for many years. They have been intelligently drawn together by diligent search, in which expense has not been considered.
